

Project Initialization and Planning Phase

Date	29 September 2026
Team ID	SWTID-2026-1180
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

I am a newly joined employee and I am trying to get my standard work laptop on my first day to start my training and work. But I have to wait for almost 5 to 7 days to receive it because the entire IT procurement process is manual. Manager approvals are done through emails, the IT team checks the laptop stock manually in Excel sheets, and purchase orders are created manually with vendors without any automation. There is no tracking in ServiceNow and no use of Flow Designer. This makes me feel frustrated, unproductive, and demotivated during my crucial first week of joining.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A new employee who needs a laptop	To get my standard laptop on day 1 to start work	It takes 5-7 days to get the laptop	The approval, stock check & vendor PO process is fully manual via email. No Flow Designer automation	Frustrated and unproductive
