

Project Executable Files

Date	29 September 2026
Team ID	SWTID-2026-1180
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	3 Marks

Project Executable Files

This section lists the executable and deployable files for the project. The solution is built on the ServiceNow platform, so it is deployed as an Update Set (exported XML) on a ServiceNow instance instead of a compiled application.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	[Yes / No]
2	README / Setup Guide (instructions to run the project)	[Yes / No]
3	requirements.txt / package.json / dependency file	NA
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	[Yes / No]
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	[Yes / No]
10	Demo video or walkthrough (if required)	[Yes / No]

Step 2: File / Folder Structure

Overview of the project's file and folder structure:

```
/project-root
/update-set - Exported Update Set XML (catalog item, flow, notifications, roles)
/tests - Test cases and test results
/docs - Project documentation (PDF reports)
/screenshots - Catalog item, flow and notification screenshots
README.md - Setup and run instructions
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	[https://your-instance.service-now.com]
Login Credentials (Demo)	[Provide demo username and password for evaluator access. Use a demo requester account, not your admin account]
Platform / Hosting Provider	ServiceNow Personal Developer Instance (cloud hosted)
Repository Link	[Paste your GitHub / GitLab link here]
Demo Video Link	[Paste your demo video link here]

Step 4: Run Instructions

Step by-step instructions for the evaluator to run the project:

Pre-requisites:

ServiceNow Personal Developer Instance (from developer.servicenow.com), admin access, and a modern web browser (Chrome / Edge).

Step 1: Sign in to the ServiceNow instance as admin.

Step 2: Go to System Update Sets > Retrieved Update Sets and import the provided Update Set XML. Step 3: Open the imported Update Set, click Preview, resolve any issues, then Commit.

Step 4: Open Flow Designer, find the Standard Laptop Order flow and make sure it is

Active. Step 5: Create or use demo users with requester, manager and IT fulfiller roles.

Step 6: Open the Service Portal (/sp) as the requester and order a Standard Laptop from the catalog.

Step 7: Verify the manager approval, the fulfillment task, the request state update and the email notifications.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Vendor / procurement system integration is not implemented yet.	Pending. Planned as future work using IntegrationHub / REST.
2	Email notifications may be delayed or limited on a developer instance.	Check System Logs > Emails to verify the notifications were generated.
3	Developer instance hibernates after a period of inactivity.	Log in to developer.servicenow.com and wake the instance before testing.
