

Solution Architecture

Date	29 September 2026
Team ID	SWTID-2026-1180
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	5 Marks

Solution Architecture Diagram:

High-level architecture of the automated laptop ordering solution built on the ServiceNow platform, showing the Presentation Layer, Application Layer and Data Layer.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Lets employees browse the catalog and submit a standard laptop request; approvers and IT fulfillers view and act on requests and tasks.	Service Portal, Service Catalog, Catalog Variables, Approvals, Workspace
Platform Gateway	Receives user requests and enforces form behavior and validation before the flow starts.	ServiceNow instance, REST API, Catalog Client Script, UI Policy
Auth Service	Controls who can request, approve and fulfil orders through roles and access rules.	Users, Groups, Roles, ACLs, SSO (optional)
Core Logic (Flow)	Automates the order: triggers on the catalog request, asks manager approval, creates fulfillment task, updates request state and closes it.	Flow Designer, Approval action, Create Catalog Task, Update Record
Notifications & Integrations	Sends status emails to requester and approver; optionally connects to vendor or procurement systems.	Email Notifications, Events, IntegrationHub, REST
Database	Stores requests, items, tasks, users, groups and hardware assets for tracking and reporting.	ServiceNow tables (sc_request, sc_req_item, sc_task, sys_user, alm_hardware), CMDB, Reports
