

Customer Journey Map

Date	29 September 2026
Team ID	SWTID-2026-1180
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Customer Journey Map

The map below follows an employee ordering a standard laptop with the automated solution, capturing their actions, touchpoints, thoughts and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1: Request	Stage 2: Approval	Stage 3: Fulfillment & Delivery
Actions <i>What does the customer do?</i>	- Logs into the Service Portal - Opens the Standard Laptop item - Selects model and enters justification and delivery location - Submits the request	- Waits for the manager's decision - Checks request status on the portal - Manager reviews and approves or rejects	- Tracks the request until the task is completed - Receives the laptop - Confirms delivery
Touchpoint <i>What part of the service do they interact with?</i>	- Service Portal - Service Catalog item form - Confirmation email	- Approval email / approvals view - Request status page - Flow Designer automation (background)	- Catalog task for IT Procurement - Email notifications - IT help desk (for handover)
Customer Thought <i>What is the customer thinking?</i>	"Is it easy to find and order the laptop?" "Did my request go through?"	"How long will approval take?" "Where is my request now?"	"When will I get my laptop?" "Was my request handled correctly?"
Customer Feeling <i>What is the customer feeling?</i>	Hopeful and confident: the form is simple and a confirmation arrives immediately.	Slightly anxious while waiting, but reassured by automatic status updates.	Relieved and satisfied: the laptop arrives with clear updates at each step.
Process Ownership <i>Who is in the lead on this?</i>	Employee (Requester)	Manager (Approver) and Flow Designer automation	IT Procurement / Fulfillment team

Opportunities <i>How can we improve this stage?</i>	• Pre-fill user details from the profile • Show approved laptop models with specs • Add clear validation messages	• Send approval reminders • Allow approval from mobile • Add auto-escalation for late approvals	• Integrate with vendor systems • Auto-create asset records on delivery • Collect feedback after delivery
