

PHASE 5 – PROJECT DEVELOPMENT PHASE

Project Title

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Objective

The objective of this phase is to develop the automated workflow in ServiceNow using Flow Designer.

Development Steps

Step 1 – Create Flow

1. Open ServiceNow.
2. Go to All and search for Flow Designer.
3. Open Flow Designer under Process Automation.
4. Click New and select Flow.
5. Enter Flow Name as Standard Laptop Task.
6. Select Application as Global.
7. Select Run User as System User.
8. Submit the flow.

Step 2 – Configure Trigger

1. Click Add a Trigger.
2. Search for Service Catalog.
3. Select Service Catalog.
4. Click Done.

Step 3 – Configure Action

1. Click Add an Action.
2. Search for Create Catalog Task.
3. Select the action.
4. Select Requested Item Record in Request Item.
5. The table is automatically populated as Catalog Task.
6. Enter Short Description as Laptop need to Configured.
7. Add Description with the same value.
8. Set Assignment Group as Hardware.
9. Set Approval as Approved.
10. Leave remaining fields as default.
11. Click Done.
12. Save the flow.
13. Activate the flow.

Step 4 – Assign Flow

1. Open Maintain Items.
2. Search for Standard Laptop.
3. Open the Standard Laptop record.
4. Select Process Engine.
5. Remove the remaining automations.
6. Add the created Standard Laptop Task flow.
7. Save the record.

Solution

The development implements the complete automated workflow using ServiceNow Flow Designer and connects it with the Standard Laptop Service Catalog item.

Expected Outcome

The Standard Laptop request can automatically generate a Catalog Task and assign it to the Hardware group after approval.

Phase Conclusion

The development phase successfully establishes the automated workflow required for Standard Laptop procurement.
