

PHASE 6 – PROJECT TESTING PHASE

Project Title

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Objective

The objective of this phase is to verify that the automated Standard Laptop procurement workflow works as expected.

Test Scenario

Test 1 – Open Service Catalog

Open ServiceNow and navigate to Service Catalog.

Expected Result:

Service Catalog should open successfully.

Test 2 – Select Standard Laptop

Navigate to Hardware → Standard Laptop.

Expected Result:

The Standard Laptop item should be available.

Test 3 – Place Order

Click Order Now to place the request.

Expected Result:

The request should be created and the order status should be displayed.

Test 4 – Approve Request

Open the Request Number and navigate to the Approvers section.
Approve the request.

Expected Result:

The request should be approved.

Test 5 – Check Requested Item

Open the Requested Item section.

Expected Result:

The requested item record should be available.

Test 6 – Verify Catalog Task

Scroll to Catalog Tasks and open the created task.

Expected Result:**The task should show:**

- Updated status
- Short Description: Laptop need to Configured
- Assigned Group: Hardware

Solution

The testing process verifies the complete workflow from placing the Standard Laptop order to creating and assigning the Catalog Task.

Expected Outcome

The automated flow should correctly create the required task and assign it to the Hardware group after approval.

Phase Conclusion

Testing confirms whether the automated laptop procurement workflow performs the expected actions and displays the required task information.
