

PHASE 1 – BRAINSTORMING & IDEATION PHASE

Project Title

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Objective

The objective of this phase is to identify the problems in the existing IT procurement process and develop an idea for improving the standard laptop ordering process.

Problem Identified

The existing IT procurement process involves manual work and lacks automation. Standard laptop requests may require configuration, but this step can be delayed or overlooked. This results in longer waiting time and inefficient resource allocation.

Proposed Idea

The proposed idea is to use Service Now Flow Designer to automate the standard laptop procurement process.

Solution

A Flow will be created to automatically generate a Catalog Task after the service request is approved. The task will contain the required laptop configuration details and will be assigned to the Hardware assignment group.

Expected Outcome

- Reduce manual intervention.
- Reduce delays in laptop configuration.
- Automatically create required tasks.
- Assign tasks to the Hardware group.

- Improve the efficiency of IT procurement.

Phase Conclusion

The brainstorming phase identifies Flow Designer automation as a suitable solution for streamlining standard laptop procurement.
