

Problem-Solution Fit

Date	29 September 2026
Team ID	SWTID-2026-1180
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

The canvas below checks that the automated laptop ordering solution addresses the root causes, behaviors and limitations of the target users.

1. CUSTOMER SEGMENT(S) [CS] - Employees and new joiners who need standard laptop - Managers who approve requests - IT procurement / fulfillment team	6. CUSTOMER LIMITATIONS [CL] EG. BUDGET, DEVICES - Limited IT staff time and budget - Approvers busy or working remotely - Needs to work on any browser or mobile device - Only standard models allowed by policy	5. AVAILABLE SOLUTIONS [AS] PROS & CONS - Email / phone requests: easy but slow, untracked - Spreadsheets: simple but error-prone - Manual catalog ordering: tracked but needs manual follow-up
2. PROBLEMS / PAINS [PR] + ITS FREQUENCY - Approval delays and lost requests (daily) - Missing details need repeated follow-up (often) - No visibility of order status (every request)	9. PROBLEM ROOT / CAUSE [RC] - Order handling is manual and email-based - No standard request form or approval routing - No automated task creation or status updates	7. BEHAVIOR [BE] + ITS INTENSITY - Employees repeatedly chase IT for updates (high) - IT staff re-enter the same data across tools (high) - Managers approve late or miss emails (medium)
3. TRIGGERS TO ACT [TR] - New hire onboarding - Laptop replacement or hardware failure - Pressure to cut turnaround time and manual effort	10. YOUR SOLUTION [SL] - Service Catalog item for standard laptops with simple form variables - Flow Designer flow triggers on request, sends approval to manager, creates fulfillment task, updates request state - Automatic email notifications at each stage - Reports and dashboard to track turnaround time - Result: faster, error-free, fully tracked laptop orders with no custom code	8. CHANNELS OF BEHAVIOR [CH] ONLINE - Service Portal / Service Catalog - Email approvals and notifications
4. EMOTIONS [EM] BEFORE / AFTER - Before: frustrated, anxious, uncertain - After: relieved, confident, satisfied		OFFLINE - Calling or visiting the IT help desk - Asking the manager in person for sign-off - Physical laptop handover
