

Code-Layout, Readability and Reusability

Date	29 September 2026
Team ID	SWTID-2026-1180
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the solution in terms of its structure, readability, and reusability. Well-organized flows, scripts and configuration with proper naming conventions, comments, and modular design ensure that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	Client and server scripts use uniform 4-space indentation.
2	Proper File Structure	Files and folders are logically organized	Yes	Components grouped in one Update Set / application scope (catalog item, flow, notifications).
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Catalog variables named clearly, e.g. laptop_model, business_justification, delivery_location.
4	Function / Method Names	Functions are descriptively named	Yes	Flows and actions named by purpose, e.g. Standard Laptop Order Flow, Manager Approval.
5	Code Comments	Inline and block comments explain logic	Partial	Comments added on scripts and flow steps; can be extended.
6	Modular Design	Code is split into reusable functions/modules	Yes	Approval and task creation built as separate reusable flow/subflow steps.
7	No Redundant Code	Duplicate or unused code is removed	Yes	Unused test flows and inactive records removed.
8	Error Handling	Exceptions and errors are handled gracefully	Partial	Rejected approvals handled; retries for failed steps to be added.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Standard Laptop Catalog Item	ServiceNow Service Catalog	Other standard hardware items (monitor, keyboard, phone)	High
2	Manager Approval Flow / Subflow	Flow Designer	Any catalog item needing manager approval	High
3	Create Catalog Task Action	Flow Designer	All fulfillment requests handled by IT	Medium
4	Email Notification Templates	ServiceNow Notifications	Approval and fulfillment status updates for other requests	Medium
5	Request Status Report / Dashboard	ServiceNow Reports	Tracking other catalog request types	Low

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	4	Logical grouping of catalog, flow and notification components.
Readability	4	Clear names for variables, flows and actions.
Reusability	4	Approval and task steps reusable across catalog items.
Documentation / Comments	3	Comments present; detailed documentation can be improved.
Overall Score	3.75	Well-structured, maintainable and reusable solution.
