

Performance Testing

Date	29 September 2026
Team ID	SWTID-2026-1180
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how the laptop ordering solution behaves under expected and peak load conditions. The sections below document the testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	Apache JMeter (API load); ServiceNow Transaction Logs and Flow Designer execution details for server-side timings
Type of Testing	Load Testing and Spike Testing
Target Module / API	Standard Laptop catalog order (Service Catalog Order Now API) and the triggered Flow Designer approval and task creation flow
Test Environment	Cloud hosted: ServiceNow Personal Developer Instance (PDI)
Test Date	[Enter test date]

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Baseline: single user submits a laptop request	1	60	Request created, approval and task flow completes with no errors
2	Normal load: users submit requests concurrently	10	120	Avg response under 2 sec, error rate under 1%

3	Peak load: higher concurrent submissions	25	180	Max response under 5 sec, no failed flows
4	Spike: sudden burst of requests	50	60	System stays responsive and recovers to normal after the burst

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds			
2	Response Time (Max)	< 5 seconds			
3	Throughput (Req/sec)	> 2 req/sec			
4	Error Rate	< 1%			
5	CPU Utilization	< 80%			
6	Memory Utilization	< 80%			

Actual Value, Status and Remarks to be filled in after running the tests.

Step 4: Observations & Analysis

Key Findings: [Describe what the test results revealed about your system's performance] Bottlenecks Identified: [List any performance bottlenecks observed during testing] Optimization Steps Taken: [Describe any changes or optimizations made to improve performance]
--

Step 5: Screenshots / Evidence

Attach screenshots of your performance testing tool results below (e.g., JMeter summary report, response time graph, Flow Designer execution details):
